

## **Background**

The School is committed to fostering policies, practices and education programs which will protect and preserve the environment.

## **Procedures**

1. The School will endeavour to purchase environmentally friendly products that will provide the highest possible level of performance. The efficient use of energy and water will be guiding principles in all renovations, new construction and operations.
2. The School encourages and supports initiatives to reduce, recycle and recover waste materials.
3. The School supports staff development initiatives designed to advance awareness, education and care of the environment.
4. The School will promote local habitat conservation and improvement on all Society-owned or leased properties.
